

01 / THE PROBLEM

The Hidden Cost of Manual HACCP Compliance

Despite critical importance, HACCP compliance remains manual and fragmented. Monitoring data lives across disconnected systems. Documentation is retrospective. Real-time visibility is limited. Compliance is reactive, not proactive.

30–40%

Time Wasted

Of quality team time spent on manual record compilation and audit preparation instead of strategic work

8–72hr

Detection Delays

Common breach detection delays in manual monitoring environments, extending exposure windows

14–28d

Audit Preparation

Days of focused effort required for audit readiness versus on-demand validation

Financial Consequences

\$250K–\$1M+

Per preventable incident (recalls, rework, disposal)

Certification Loss

Market access restricted, customer delistings

Brand Damage

Customer relationships eroded, competitive disadvantage

Scale Constraint

Unable to grow operations without proportional overhead

02 / THE SOLUTION

Real-Time HACCP Compliance Built for Operations

A purpose-built HACCP compliance system that transforms compliance from a reactive, manual function into real-time, automated, and auditable operations. Not a generic compliance tool — a HACCP-specific platform embedded into daily workflows.

PILLAR 01

Ensure Compliance

- Real-time digital monitoring of all CCPs
- IoT/Sensor integration for automated capture
- Immediate breach detection & alerts
- Structured corrective action workflows
- Auto-generated compliance documentation

PILLAR 02

Drive Adoption

- Guided workflows with embedded context
- Role-based dashboards & accountability
- Automated reminders & scheduling
- Real-time performance visibility
- Feedback loops & recognition

PILLAR 03

Learning & Knowledge Hub

- Built-in compliance knowledge base
- Interactive training & onboarding
- Performance analytics & insights
- Best practices library
- Certification support templates

Target Industries

Food & Beverage Manufacturing

Pharmaceuticals & Healthcare

Cosmetics & Personal Care

Nutraceuticals

Decision-Makers

Quality Directors & Compliance Officers

Facility Managers & Process Managers

Operations Leaders & COOs

Board/Executive Leadership

03 / UNIQUE VALUE

Why We're Different

01 / IOT-POWERED MONITORING

Sensors Monitor. The Platform Responds. Automatically.

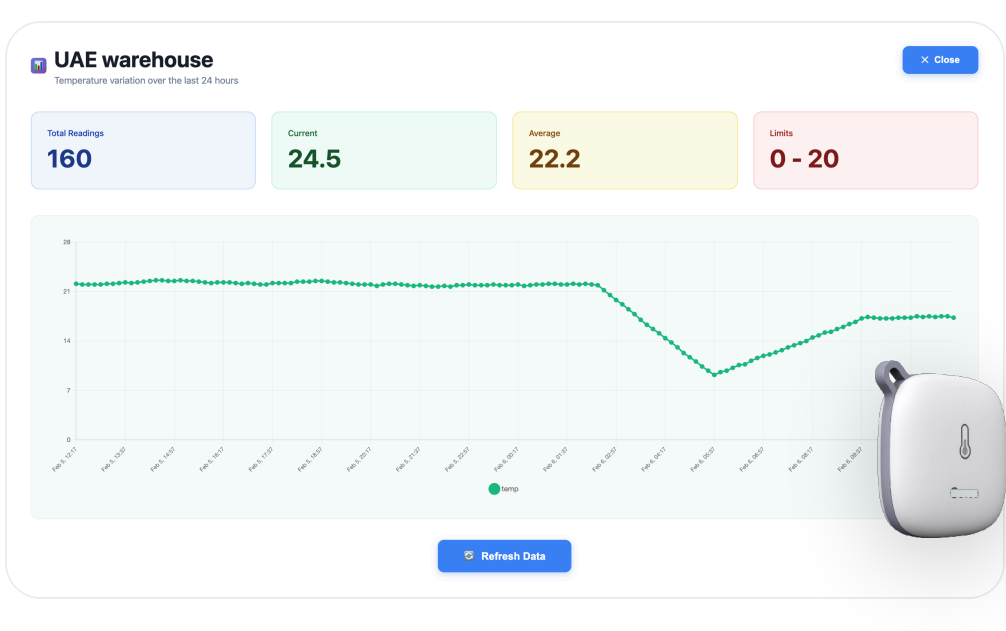

Connect temperature, humidity, and pressure sensors — configurable polling intervals (5 min, 15 min, 1 hour), 24/7

Critical limits checked on every reading — breaches detected the moment they happen

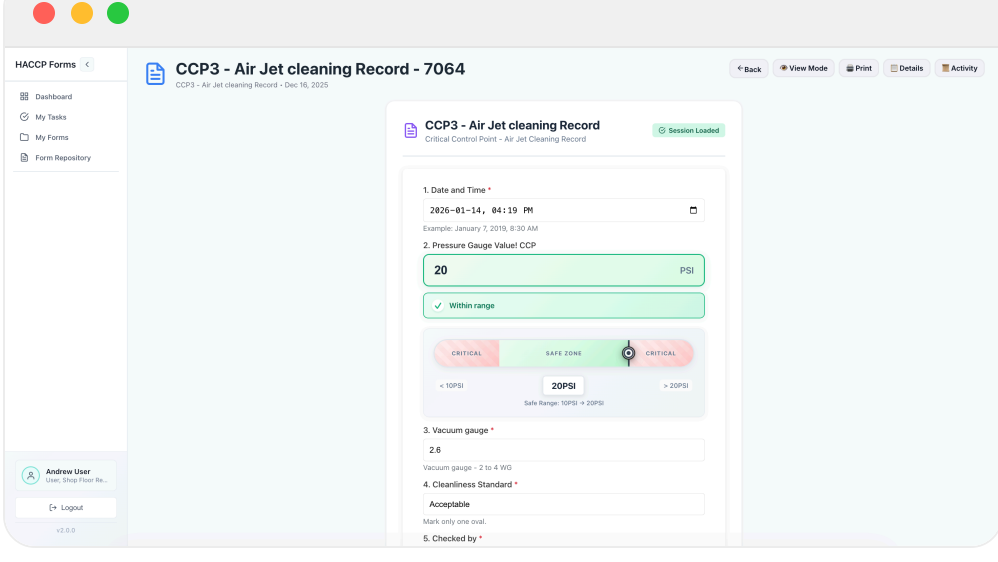

Corrective action forms auto-created and routed to your workflow — no human trigger needed

24-hour trend graphs with limit lines — see exactly when and where readings drifted

From sensor reading to corrective action — zero manual steps

All product images are for illustrative purposes only. Brands shown belong to their respective owners and do not imply partnership or endorsement.

02 / GUIDED WORKFLOWS

Staff Adoption Through Guided Workflows

Embedded context & understanding (why, not just what)

Role-based accountability & visibility

Cultural shift from burden to ownership

95%+ task completion rate vs. 70–80% in manual systems

Team ownership, not compliance fatigue

03 / SCALABILITY

Scalability Without Cost Multiplication

Automated monitoring reduces manual labor

Same rigor across 1 or 5 facilities

Knowledge hub scales organization-wide

Enable growth without compliance bottleneck

Operations scale, compliance costs don't
